Education

Netaji Subhas University of Technology — New Delhi
Bachelor of Technology in Mathematics and Computing — *Nov. 2022 – May 2026*

Lbs Convent School — Kota ,Rajasthan
Class 12th

Experience

Software Engineering Intern — March 2026 – June 2026
Stable Money — *Bengaluru, India*

- Developed and enhanced backend services for PartnerHub using Kotlin, Spring Boot, gRPC, and PostgreSQL
- Designed and integrated gRPC APIs for partner and customer-related workflows.
- Implemented pagination, filtering, and customer aggregation for efficient and scalable data handling

Software Engineer Intern — Jan. 2026 – Mar 2026
Proso.Ai — *Noida, India*

- Developed event-driven integrations between Smartsheet and Freshservice using REST APIs and Zapier, automating data synchronization across business workflows.
- Designed and integrated backend API workflows to exchange and process data between third-party platforms, improving reliability and reducing manual operational steps.

Software Engineer Intern — June 2025 – July 2025
DGLiger — *Gurugram, India*

- Engineered and optimized RESTful APIs for Marks Spencer's ANR Admin Portal using Java, Spring Boot, and MongoDB, modernizing the codebase from Java 11 to Java 17 to achieve [number] modulus improvement in performance and scalability.
- Refactored a Spring Boot application to eliminate code duplication and streamline architecture, and integrated AWS S3 for cloud storage, enhancing system reliability and operational efficiency

Projects

LibraFlow | *Java ,Maven Spring Boot, Hibernate, MySQL, JPA*,Git

- Developed a RESTful backend for a library management system using Spring Boot and Hibernate, implementing book borrowing and return functionalities with transactional consistency
- Built secure and scalable JSON-based APIs following the MVC architecture and Controller-Service-Repository pattern, with robust exception handling and MySQL integration
- Tested and validated REST APIs using Postman, ensuring correct functionality and adherence to REST standards

AskMyDocs | Streamlit, LangChain, Google Gemini API, Python

- Built an AI-powered document assistant using LangChain and Streamlit, enabling users to upload multiple PDFs and ask natural-language questions across their documents
- Implemented a Retrieval-Augmented Generation (RAG) pipeline to retrieve relevant document context and provide context-aware answers instead of relying solely on the language model
- Integrated FAISS vector database to store and perform high-speed similarity search across PDF embeddings, ensuring real-time and scalable query performance

Technical Skills

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, Mongodb
Frameworks: Spring Boot, AWS S3 bucket, Git, Redis, Maven, Postman, Spring Data JPA, Hibernate
Developer Tools: Git, Docker , VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Acheivements

SIH 2024 COLLEGE FINALIST—Attained college round finalist recognition at SIH 2024, showcasing technical expertise, strategic problem-solving, and effective teamwork.
JEE MAIN 2022: Secured the **98.2 percentile among 1.3 million candidates.**
Solved 600+ coding problems on platforms like CodeChef and LeetCode, strengthening algorithmic thinking
